Issue Amounts

\$10,000 - \$100,000 volumes

8 Qualifying Questions

Coverage issued upon answering 'no' to qualifying questions, provided there are no unfavourable reports from the Medical Information Bureau

You need to protect yourself and your family against the high cost of rebuilding your lifestyle following a critical illness.

The Quick Issue Critical Illness plan is designed to provide funds to help you financially care for yourself and your family and maintain the same quality of life after surviving a critical illness. The plan provides a tax-free lump sum living benefit to the owner of the plan on the occurrence of the first of the 14 covered illnesses, provided the insured survives the waiting period following the onset of the critical illness (30 days from diagnosis, except for the Loss of Speech (180 days) and Paralysis (90 days)). No living benefit is payable if cancer is diagnosed within 90 days of issue.

The 3 Plan Options:

10 Year Term Renewable to Age 75

Provides level insurance coverage with premiums that increase every 10 years as the plan is renewed. Coverage can be provided until age 75.

Level Term to Age 75

Provides level insurance coverage with premiums that remain level and never increase. Provides coverage to age 75.

Level Term to Age 75 with Flexible ROP (Return of Premium)

Provides level insurance with premiums that remain level and never increase. Provides coverage to age 75. Flexible Return of Premium (ROP) is an option that becomes available when you reach the later of age 65 or the 10th policy year with no critical illness benefit having been paid and the policy still in force. The Flexible ROP benefit gives you the option to surrender the policy and receive 50% of the annual premiums paid on the in force volume, with the percentage of return proportionately increasing to a 100% return of premium at age 75.

Surviving a life threatening illness such as a heart attack, stroke or cancer often imposes more of a financial strain on a family than death.

Did you know?

- 1 in 3 Canadians will contract some sort of life threatening **cancer**.
- It is estimated that there are 70,000 **heart attacks** per year in Canada. That equates to 1 every 7 minutes.
- More than 36,600 Canadians were living with **kidney failure** by the end of 2008.

QUICK ISSUE CI *Qualifying Questions*

- 1 Within the last two years, have you had an application for individual life insurance or critical illness insurance rated, declined, postponed or had exclusions added by Wawanesa Life or any other company?
- 2 Have you ever been treated for, diagnosed, consulted a doctor, received abnormal test results or experienced symptoms of the following:
 - a) Heart attack, congenital cardiac defects, angina, angioplasty, coronary artery bypass, congestive heart failure, stroke, transient ischemic attack (TIA), arteriosclerosis or any other cerebrovascular disease or disease of the heart or the blood vessels, or an abnormal electrocardiogram (EKG)?
